

INTEGRI announces

The EMV Card Level 1 Test Tool has successfully passed the EMVCo qualification process.

19th of January 2007, Zaventem, Belgium – Integri, leading provider of IT solutions for testing and simulating electronic transactions, announced today the EMVCo qualification of the EMV Card Level 1 Test Tool.

The test suite is fully automated and contains a complete set of functional tests for Card Level 1 approval. The resulting test suite is available as an off-the-shelf product that runs on the INQ Level 1 Platform, Integri's core platform for all solutions in Low-Level Protocol Testing.

Jan De Meester, Managing Director, Integri said, "We are happy to add the EMV Card Level 1 Test Suite to our range of qualified solutions. We had already a certified solution for EMV Terminal L1. The addition of the EMV Card L1 Test Suite completes our product offering of qualified solutions."

Next to EMV Card L1, Integri is also qualified by EMVco for EMV CCD L2 and provisionally qualified for EMV CPA.

About Integri

Integri NV was established in 1992 and is headquartered in Zaventem, Belgium. Integri is the leading global provider of IT solutions for testing and simulating electronic transactions. It offers a wide range of products, services and consulting for testing smart cards, terminals and hosts. For more than 10 years, Integri has led the market with its smart card (payment and SIM card) test tools. Its INQ Platform provides a fully integrated test and prototyping solution for testing smart card compliance, payment transactions, EMV (L1&L2) applications, GSM/UMTS applications, terminals and hosts.
